Professional Summary

Java Full Stack Developer with hands-on experience building scalable web applications using Java, Spring Boot, React.js, and MySQL. Skilled in designing secure REST APIs, implementing JWT authentication, Google OAuth2, role-based authorization, Cloudinary-based image storage, and Razorpay payment integration. Comfortable working across the full development lifecycle, from database design to responsive front-end implementation, with a strong focus on writing clean, maintainable, production-ready code.

Technical Skills

Languages: Java, SQL, JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Tailwind CSS, Bootstrap, Axios

Backend: Spring Boot, Spring Security, REST APIs, JDBC, Servlets, JSP

Database: MySQL, Spring Data JPA, Hibernate

Authentication: JWT, Google OAuth2

Tools: Git, GitHub, Maven, Eclipse IDE, VS Code, Apache Tomcat, Postman, MySQL Workbench

Experience

Full Stack Developer Intern, BDreamz Global Solutions, Chennai Jan 2026 – Present

- Undergoing hands-on Java Full Stack Development training with real-world project implementation.
- Building full-stack web applications using Java, Spring Boot, React.js, MySQL, REST APIs, and Git.
- Working with Spring Security, JWT Authentication, Google OAuth2, Cloudinary, and Razorpay integration.
- Developing responsive applications following MVC architecture and industry best practices.
- Collaborating with peers and mentors to review code, debug issues, and deploy applications to production.

UI/UX Designer Intern, G-Tec Computer Education, Chennai May 2025 – Jun 2025

- Redesigned website interfaces to improve usability and visual consistency.
- Created responsive UI layouts and wireframes using Figma.
- Collaborated with developers to translate design mockups into functional, user-friendly screens.

Projects

KickKart – Football Jersey Store Live | GitHub

Spring Boot, React.js, MySQL, Spring Security, JWT, Google OAuth2, Cloudinary, Razorpay

- Developed a full-stack football jersey e-commerce application using Spring Boot and React.js following REST API architecture.
- Implemented secure authentication using JWT and Google OAuth2 with role-based authorization.
- Integrated Cloudinary for cloud image storage and Razorpay for secure online payments.
- Built product management, shopping cart, checkout, order management, and admin dashboard.
- Deployed the frontend on Netlify and the backend on Railway for a fully live production application.

Spring Boot JWT & Google OAuth Authentication GitHub

Spring Boot, Spring Security, JWT, Google OAuth2, MySQL

- Built a secure authentication system with JWT-based authentication and authorization for protected REST APIs.
- Integrated Google OAuth2 login with automatic user registration and JWT generation.
- Developed Forgot Password, OTP Verification, Password Reset, and role-based authorization.
- Configured stateless authentication using custom JWT filters following security best practices.

Hostel Room Allocation System GitHub

Java, JSP, Servlets, JDBC, MySQL, Apache Tomcat

- Developed a hostel management application with Student, Room, and Allocation Management modules with complete CRUD operations.
- Built secure admin authentication using session management and logout functionality.
- Designed room allocation logic with capacity validation, occupancy tracking, and duplicate allocation prevention.
- Developed a dashboard displaying student records, room availability, and active allocations.

Education

B.Sc. Computer Science with Data Science 2023 – 2026

St. Thomas College of Arts and Science, Chennai CGPA: 7.25
